Why consolidate and certify your PM skills?

Organizations now understand that success is built on the success of their projects.

Organizations of all types and sizes today understand that **everything is a project** – from implementing a new business system, to getting the boss to Europe and back over 10 days, to organizing a meeting. That means everyone in every functional area – from executive assistants to vice presidents – **is a potential project manager**. Top organizations foster success by cultivating strong project resources and supplying their people with the tools and formal training they need to get the job done right the first time.

Why formal training in project management?

Projects can have a lot of moving parts. Successfully managing them requires more than just using PM software to make Gantt charts. **Without formal training, those who execute projects are essentially winging it, learning on the job through trial and error.** They cannot be sure that what they're doing is right or wrong, or missing something, or that the solution they implement is the best possible course of action. To excel at the job, a project manager requires concise, comprehensive formal training in the **best practices, current thinking, and tools of the trade.**

Project managers are now expected to add value.

The PM field is becoming very competitive. Top PMs know that in order to deliver on time, on spec, and on budget, they **need to know all facets of the field and apply their knowledge nimbly and accurately.** That means being able to communicate with the team, manage stakeholders, procure and plan, ensure quality, minimize risk, and so much more.

Truly competitive companies want project managers who can connect the work to the overall strategy, and **add value by bringing a complete skill set to bear.** A well-trained project manager trumps the person who's winging it every time.

Masters Certificate in Project Management

The Masters Certificate in Project Management has been designed from the ground up to build excellent Project Managers – skillful, strategic leaders who can consistently guide projects to success.

The program can return many times the value of the financial investment for years to come through successfully-executed projects.

Participants will benefit from:

- The ability to look at projects in a whole new light and manage them systematically and strategically.
- A huge kit of powerful new tools, documents and templates which can be used as is or modified to suit.
- Getting prepared to write the PMP® designation exam through mastery of the material and the required contact hours (please refer to pmi.org for complete application requirements).
- Hands-on practice applying the material through a simulated project woven throughout the program – our ‘secret sauce’ for accelerated, intensified learning.

New updated content!

Introduction to Agile and Scrum

Agile is now a part of most organizations' project management vocabulary: “Should we, shouldn't we... can we combine our current practice with agile?” This new module will help us all be a part of that conversation.

Online PMP Exam Preparation Modules

Designed especially for this program, these 2-hour optional modules will take the PMP Exam candidates through an extensive review of exam requirements and sample questions for each module.

Exclusive access to online videos, interviews and articles on the future of Project Management

Participants will gain access to a library of online content discussing the future of our industry and how we can be better prepared. Topics will include: Artificial Intelligence, digital transformation, block chain, data analytics and more.

Overview of Course Modules

MODULE 1: Oct. 9, 2024

Program Introduction

Review course objectives, establish a strong foundation for learning, introduction to PM fundamentals and knowledge areas.

MODULE 2: Oct. 23 - 25, 2024

Project Planning and Control

A complete foundation in successful planning and implementation.

MODULE 3: Nov. 6 - 7, 2024

Introduction to Agile and Scrum

Understand key elements of Agile and Scrum and how to apply them to any project.

MODULE 4: Nov. 20 - 21, 2024

Project Quality Management

Learn how to build quality measures into every project.

MODULE 5: Dec 4 - 5, 2024

Assessing & Managing Project Risk

Approaches to evaluating project uncertainties and risks.

Participant Profile

The Masters Certificate in Project Management is ideal for:

- Mid- and senior-level managers who have completed an introductory project management program in recent years, and must now lead more complex projects
- Anyone who does NOT have their PMP® designation from PMI® and who wishes to consolidate and certify their project management training for career success
- Project managers from any industry with at least one year experience, who wish to move up to a higher level in their field

Unique Program Features and Benefits Include

- Minimizes time spent away from work – just 18 days spread over 4 to 5 months
- Covers all 10 Project Management Body of Knowledge areas to build your total skill-set
- Team-taught by real-world project instructors with extensive experience
- Great networking and sharing of experiences to reinforce your learning
- Designed to lead to senior level career advancement opportunities

Green Program!

Participants will receive all program learning materials electronically, and are required to have a suitable tablet, laptop or PC for class. Alternative arrangements are available upon request.

Registration Details
